

CONTENTS

Special Issue

Foreword	169
Accuracy and performance evaluation of a clinical decision support system for laboratory result alerts <i>InSook Cho, SunTae Kim, JeongAh Kim, Kyu Seob Ha and Yoon Kim</i>	171
An ant colony optimization approach for the preference-based shortest path search <i>Seung-Ho Ok, Woo-Jin Seo, Jin-Ho Ahn, Sungho Kang and Byungin Moon</i>	181
A formal methodology for semantics and time consistency checking of UML dynamic diagrams <i>Youcef Hammal</i>	197
Embedded control software design with aspect patterns <i>Takahiro Soeda, Yuta Yanagidate and Takanori Yokoyama</i>	213
Comparison of power and combining gains on an ARQ-aided downlink time switched transmit diversity in a WCDMA LCR-TDD system <i>Seung-Hoon Hwang and Cha-Eul Jeon</i>	227

Regular Issue

Pulsed cutting fluid improved machining process <i>Shijin Zhang, Zhenfang Liao and Deshu Chen</i>	233
Explicit characteristic finite volume method for convection-diffusion equation on rectangular grids <i>Sutthisak Phongthanapanich and Pramote Dechaumphai</i>	239
Analysis of vibration in shaft-disc-blades systems due to power faults using a finite element method <i>Chun-Tang Chao, Tsung-Lin Fan Chiang, Chwen Chyn and Chi-Jo Wang</i>	253
Evaluations of mixed-mode stress intensity factors for load-carrying fillet welded cruciform joints using the least-squares method <i>Hsin-Yang Chung, Rong-Shiuan Lin and Kun-Jhen Lin</i>	265
Effect of mineral admixtures and viscosity modifying admixtures on plastic shrinkage cracking of cementitious composites <i>Shih-Tang Lin, Ran Huang and Tsai-Lung Weng</i>	287
Optimum estimator for SPOT-pan and ALS-lidar intensity image registration via tie points <i>Joz Wu, Chi Chang and Chia-Yuan Hsu</i>	299
Improvement of fast responsive LC materials by bent-core dopants in optical compensated bend mode liquid crystal displays <i>Hong-Cheu Lin, Ling-Yung Wang, Meng-Dan Jiang, Shin-Yi Tsai, Szu-Fen Fenny Chen, Robert Lyu and Chi-Neng Mo</i>	311
