

Contents

Hydrodynamics

- Experimental study on resistance and longitudinal motion of high-speed air cavity craft
in regular waves.....*DONG Wen-cai OU Yong-peng*(949)
- Numerical simulation of pressure distribution in vertical water-entry cavity
.....*HE Chun-tao WANG Cong WEI Ying-jie WANG Bai-qiu*(960)
- Study of a hybrid method based on FDM and MLSFD method
.....*CHEN Shan-qun LIAO Bin LI Hai-feng*(969)
- Parametric identification of AUV's maneuvering motion based on support vector machines
.....*XU Feng ZOU Zao-jian SONG Xin*(981)
- Research on calculation methods of hydrodynamic coefficients for sections with complex shape
.....*GAO Ni SUN Shu-zheng ZHAO Xiao-dong LI Ji-de*(988)

Structural mechanics

- Parametric study of global response behavior of deepwater free standing hybrid risers
.....*CHEN Hai-fei XU Si-peng GUO Hai-yan*(996)
- Investigation of sea wave and structure modelling for fatigue assessment of offshore structures
.....*JIA Jun-bo*(1005)
- Pushover analysis for seismic performance of pile-supported wharf structures
.....*LI Ying GONG Jin-xin ZHANG Yan-qing*(1022)
- Analytical study of imperfect pipeline on lateral buckling
.....*LIU Yu-xiao LI Xin ZHOU Jing*(1033)
- Research on stress intensity factor calculation based on maximum crack opening displacement
.....*CHEN Jing-jie HUANG Yi LIU Gang*(1041)
- Mechanical behaviors of adhesively-bonded, bolted and hybrid composite-to-steel joints
.....*LI Yong-sheng WANG Wei-bo*(1052)

Hydro/Structural/Acoustics

- Reflection and transmission of longitudinal displacement wave through micropolar elastic plate
in micropolar fluid.....*XU Hong-yu SUN Qing-yong ZHANG Wei LIANG Bin*(1065)
