GENERAL EDITORIAL POLICIES (1 page)	A5
INFORMATION FOR CONTRIBUTORS (4 pages)	A6

ANNOUNCEMENTS

Announcement: The 2010 François Naftali Frenkiel Award for Fluid Mechanics (2 pages)	
The Editors	010201

EDITORIALS

Referee acknowledgment for 2010 (6 pages)	
John Kim and Gary Leal, Editors	010401

AWARD AND INVITED PAPERS

Simple models of turbulent flows (20 pages)	
Stephen B. Pope	011301

LETTERS

Theoretical model for k^{-3} spectra in dispersed multiphase flows (4 pages)	
Frédéric Risso	011701
Experimental study of freely falling thin disks: Transition from planar zigzag to spiral (4 pages)	
Hongjie Zhong, Shiyi Chen, and Cunbiao Lee	011702
Visualizing the very-large-scale motions in turbulent pipe flow (4 pages)	
Leo H. O. Hellström, Aman Sinha, and Alexander J. Smits	011703
The effect of particle inertia on triaxial ellipsoids in creeping shear: From drift toward chaos to a single periodic solution (4 pages)	
Fredrik Lundell	011704

ARTICLES

Biofluid Mechanics

Instability regimes in flowing suspensions of swimming micro-organisms (18 pages)	
Amir Alizadeh Pahlavan and David Saintillan	011901
Passive hydrodynamic synchronization of two-dimensional swimming cells (19 pages)	
Gwynn J. Elfring and Eric Lauga	011902

Micro- and Nanofluid Mechanics

Modeling drag reduction and meniscus stability of superhydrophobic surfaces comprised of random roughness (8 pages)	
Mohamed A. Samaha, Hooman Vahedi Tafreshi, and Mohamed Gad-el-Hak	012001
A full analytical solution for the force-driven compressible Poiseuille gas flow based on a nonlinear coupled constitutive relation (21 pages)	
R. S. Myong	012002
Two-cell circulation in a liquid meniscus driven by a swirling gas jet (10 pages)	
Miguel A. Herrada, Vladimir N. Shtern, and José María López-Herrera	012003

Terraced spreading of nanofilms under a nonmonotonic disjoining pressure (12 pages)	
Kerry A. Landman and Lee R. White	012004

Interfacial Flows

Numerical simulation of a liquid bridge in a coaxial gas flow (11 pages)	
Miguel A. Herrada, José M. López-Herrera, Emilio J. Vega, and José M. Montanero	012101
Parametric stability and dynamic buckling of an encapsulated microbubble subject to acoustic disturbances (28 pages)	
Kostas Tsiglifis and Nikos A. Pelekasis	012102
Nonlinear development of oscillatory instability in a three-layer system under the joint action of buoyancy and thermocapillary effect (12 pages)	
Ilya B. Simanovskii, Antonio Viviani, Frank Dubois, and Jean-Claude Legros	012103
Droplet charging regimes for ultrasonic atomization of a liquid electrolyte in an external electric field (10 pages)	
Thomas P. Forbes, F. Levent Degertekin, and Andrei G. Fedorov	012104
Analysis of time-dependent nonlinear dynamics of the axisymmetric liquid film on a vertical circular cylinder: Energy integral model (12 pages)	
E. Novbari and A. Oron	012105
Wall energy relaxation in the Cahn–Hilliard model for moving contact lines (8 pages)	
Pengtao Yue and James J. Feng	012106
Dynamics of nearly unstable axisymmetric liquid bridges (11 pages)	
José M. Perales and José M. Vega	012107
The Rayleigh–Taylor instability of a surface of arbitrary cross section with pinned edges (3 pages)	
L. E. Johns and R. Narayanan	012108
First drop dissimilarity in drop-on-demand inkjet devices (6 pages)	
Amin Famili, Saurabh A. Palkar, and William J. Baldy, Jr.	012109

Viscous and Non-Newtonian Flows

Viscoelastic drop falling through a viscous medium (8 pages)	
Swamajay Mukherjee and Kausik Sarkar	013101
Linear instability of the horizontal throughflow in a plane porous layer saturated by a power-law fluid (7 pages)	
A. Barletta and D. A. Nield	013102
A study of start-up flow of thixotropic fluids including inertia effects on an inclined plane (8 pages)	
Wenwen Liu and Ke-Qin Zhu	013103
Drop deformation and breakup in polystyrene/high-density polyethylene blends under oscillatory shear flow (12 pages)	
Anuvat Sirivat, Sakchai Patako, Sumonman Niamlang, and Wanchai Lerdwijitjarud	013104

Particulate, Multiphase, and Granular Flows

Experimental investigation into segregating granular flows down chutes (10 pages)	
Sébastien Wiederseiner, Nicolas Andreini, Gaël Épely-Chauvin, Gaudenz Moser, Mathieu Monnereau, J. M. N. T. Gray, and Christophe Ancey	013301
Rheology of oscillating suspensions of noncolloidal spheres at small and large accumulated strains (9 pages)	
Hyun-Ok Park, Jonathan M. Bricker, Michael J. Roy, and Jason E. Butler	013302
Surface flows of inelastic spheres (7 pages)	
Diego Berzi and James T. Jenkins	013303
Dynamics of wet particles in rotating drums: Effect of liquid surface tension (9 pages)	
P. Y. Liu, R. Y. Yang, and A. B. Yu	013304
Viscous damping force during head-on collision of two spherical particles (9 pages)	
J. S. Marshall	013305
Elastic granular flows of ellipsoidal particles (10 pages)	
Charles S. Campbell	013306

(Continued)

Modeling of bouncing of a single clean bubble on a free surface (9 pages)	
A. Sato, M. Shirota, T. Sanada, and M. Watanabe	013307

Laminar Flows

Electromagnetically driven oscillatory shallow layer flow (10 pages)	
Aldo Figueroa, Sergio Cuevas, and Eduardo Ramos	013601
Structure of trailing vortices: Comparison between particle image velocimetry measurements and theoretical models (12 pages)	
C. del Pino, L. Parras, M. Felli, and R. Fernandez-Feria	013602
Convection-dominated dispersion in channels with fractal cross-section (10 pages)	
Alessandra Adrover	013603
Measures of mixing quality in open flows with chaotic advection (11 pages)	
E. Guillard, O. Dauchot, and J.-L. Thiffeault	013604

Instability and Transition

Electrokinetic instability: The sharp interface limit (14 pages)	
Neelesh A. Patankar	014101
Flow past two rotating cylinders (14 pages)	
S. Kumar, B. Gonzalez, and O. Probst	014102
Linear feedback control of transient energy growth and control performance limitations in subcritical plane Poiseuille flow (9 pages)	
F. Martinelli, M. Quadrio, J. McKernan, and J. F. Whidborne	014103
Convective instability in inhomogeneous media: Impulse response in the subcritical cylinder wake (7 pages)	
C. Marais, R. Godoy-Diana, D. Barkley, and J. E. Wesfreid	014104
Investigation of the resonant phenomenon of flow around a vibrating cylinder in a subcritical regime (11 pages)	
Shih-Sheng Chen, Ruey-Hor Yen, and An-Bang Wang	014105
Proper orthogonal decomposition analysis of vortex dynamics of a circular cylinder under synthetic jet control (13 pages)	
Li-Hao Feng, Jin-Jun Wang, and Chong Pan	014106
Instabilities and transition in flows between two porous concentric cylinders with radial flow and a radial temperature gradient (13 pages)	
V. V. Kolesov and L. D. Shapakidze	014107
Effect of surface tension on global modes of confined wake flows (12 pages)	
Outi Tammisola, Fredrik Lundell, and L. Daniel Söderberg	014108
Miscible viscous fingering involving viscosity increase by a chemical reaction with moderate Damköhler number (8 pages)	
Yuichiro Nagatsu, Yusuke Kondo, Yoshihito Kato, and Yutaka Tada	014109

Turbulent Flows

A wall-layer model for large-eddy simulations of turbulent flows with/out pressure gradient (12 pages)	
C. Duprat, G. Balarac, O. Métais, P. M. Congedo, and O. Brugière	015101
Excitation of inertial modes in a closed grid turbulence experiment under rotation (9 pages)	
Cyril Lamriben, Pierre-Philippe Cortet, Frédéric Moisy, and Leo R. M. Maas	015102
Electromagnetically driven dwarf tornados in turbulent convection (10 pages)	
Saša Kenjereš	015103
Contributions of turbulence to subsonic cavity flow wall pressures (13 pages)	
Nathan Murray, Richard Raspet, and Lawrence Ukeiley	015104
Comparison between rough and smooth plates within the same Rayleigh-Bénard cell (9 pages)	
J.-C. Tisserand, M. Creyssels, Y. Gasteuil, H. Pabiou, M. Gibert, B. Castaing, and F. Chillà	015105

(Continued)

A numerical study of compressible turbulent boundary layers (12 pages)	
M. Lagha, J. Kim, J. D. Eldredge, and X. Zhong	015106
Structure, scaling, and synthesis of proper orthogonal decomposition modes of inhomogeneous turbulence (15 pages)	
Jon R. Baltzer and Ronald J. Adrian	015107
Analysis of filtered Navier–Stokes equation for hybrid RANS/LES simulation (13 pages)	
Fujihiro Hamba	015108

Compressible Flows

Analytical theory for planar shock focusing through perfect gas lens and shock tube experiment designs (12 pages)	
M. Vandenboomgaerde and C. Aymard	016101

Geophysical Flows

A numerical and experimental study on the nonlinear evolution of long-crested irregular waves (15 pages)	
Arnaud Gouillet and Wooyoung Choi	016601
Effective transport rates and transport-induced melting and solidification in mushy layers (14 pages)	
S. L. Butler	016602
Turbulent mixing and passive scalar transport in shallow flows (16 pages)	
Dae-Hong Kim and Patrick J. Lynett	016603
Generation of intermediately long sea waves by weakly sheared winds (5 pages)	
V. M. Chernyavski, Y. M. Shtemler, E. Golbraikh, and M. Mond	016604

Others

Kinetic solution of the structure of a shock wave in a nonreactive gas mixture (9 pages)	
Eswar Josyula, Prakash Vedula, William F. Bailey, and Casimir J. Suchyta, III	017101

ERRATA

Erratum: “A numerical study of thermocapillary migration of a small liquid droplet on a horizontal solid surface” [Phys. Fluids 22, 062102 (2010)] (1 page)	
Huy-Bich Nguyen and Jyh-Chen Chen	019901
