

157. A Frequency Response Based Structural Damage Localization Method Using Proper Orthogonal Decomposition
M. Salehi, S. Ziaei-Rad, M. Ghayour, M. A. Vaziri-Zanjani
167. An Experimental Study of Mesh Type Flat Heat Pipes
L.-H. Chien, Y.-C. Shih
177. Hydrodynamic Performance of Two-Dimensional Undulating Foils in Triangular Formation
M.-H. Chung
191. Endochronic Fatigue Life Prediction of Sn/3.5Ag/0.75Cu BGA Solder Joints Under Oblique Displacement Cyclic Tests
C. F. Lee, T. T. Lin, P. S. Tsai
201. Analysis of Nonlinear Stress and Strain in Clay under the Undrained Condition
P.-G. Hsieh, C.-Y. Ou
215. Punch Problem for Planar Anisotropic Elastic Half-Plane
R.-L. Lin
227. Acoustic Scattering and Radiation Force Function Experienced by Functionally Graded Cylindrical Shells
J. Jamali, M. H. Naei, F. Honarvar, M. Rajabi
245. Study of Theory about Large Unified Symmetries for Hamilton Systems
Y.-P. Luo
253. Cinematographic Analysis of Counter Jet Formation in a Single Cavitation Bubble Collapse Flow
S.-H. Yang, S.-Y. Jaw, K.-C. Yeh
267. Temperature and Frequency Modified Fatigue Initiation Life of Solder Alloys Predicted by Endochronic Cyclic Damage-Coupled Viscoplasticity
C. F. Lee, S. I. Jeng, M. T. Liu
279. Evaluation of Crack Occurrence Probability of T-Shape Welded Structures
Y. Hsu, W.-F. Wu, H.-T. Kuo
- N1. Flow Mixing of Double Two-Inlet Y-Type Micro Channel with Optimal Layout of Obstacles
C.-T. Wang, Y.-M. Chen
- N5. On the Use of Temporal Reachout Technique for Characteristics Method with Time-Line Cubic Spline Interpolation
T.-L. Tsai, J.-Y. Chen
- N13. Compound Path Integral Solution of Response Exceedance Probabilities of an Offshore Structure
Y. G. Wang
- N19. Performance Analysis of a Hybrid Solar Energy Storage System
Zaem Moosavi Mohamadi, Hassan Zohoor, Morteza Khalaji Assadi, Ali A. Hamidi
