

Current transients in the small salient-pole alternator during sudden short-circuit and synchronisation events	687
R.J. Best, D.J. Morrow and P.A. Crossley	
Tracking control of thrust active magnetic bearing system via Hermite polynomial-based recurrent neural network	701
F.-J. Lin, S.-Y. Chen and M.-S. Huang	
Classification of dynamic insulation failures in transformer winding during impulse test using cross-wavelet transform aided foraging algorithm	715
P. Rajamani, D. Dey and S. Chakravorti	
Practical approach to model electric motors for electromagnetic interference and shaft voltage analysis	727
F. Zare	
Design and analysis of high-speed coreless axial flux permanent magnet generator with circular magnets and coils	739
W. Fei, P.C.K. Luk and K. Jinupun	
Parameter estimation of an induction machine using advanced particle swarm optimisation algorithms	748
D.C. Huynh and M.W. Dunnigan	
Modelling transformer core joints using Gaussian models for the magnetic flux density and permeability	761
I. Hernández, F. de León, J.M. Cañedo and J.C. Olivares-Galván	
Establishment and control of a three-phase switched reluctance motor drive using intelligent power modules	772
H.C. Chang, C.H. Chen, Y.H. Chiang, W.Y. Sean and C.M. Liaw	
Calculation of inductances and torque of an axially laminated synchronous reluctance motor	783
E.S. Obe
