

DEPARTMENT: CERF'S UP

The Internet in the 21st Century

Many people are finding ways to do harmful things through the Internet medium. Responses to these abuses have been sporadic at best.

TO THE EDITOR

Hennessy and Patterson on the Roots of RISC

Awarding ACM's 2017 A.M. Turing Award to John Hennessy and David Patterson was richly deserved and long overdue. It would have been good if "Rewarded for RISC" (June 2018) had mentioned the contributions of John Cocke at IBM. ...

Can We Use AI for Global Good?

Amir Banifatemi observes how the AI for Good Summit "allowed us to start a dialogue, find a common frame of reference, and decide how our steps would be smart and structured."

Technical Perspective: A Control Theorist's View on Reactive Control for Autonomous Drones

"Fundamental Concepts of Reactive Control for Autonomous Drones" introduces the notion of "reactive control" in which an autopilot's control logic is run only intermittently based on whether readings from sensors indicate a need ...

Fundamental Concepts of

Reactive Control for Autonomous Drones

We conceive a notion of reactive control that allows drones to execute the low-level control logic only upon recognizing the need to, based on the influence of the environment onto the drone operation.
