SCIENTIFIC STATEMENT

- 79 **The Science of Obesity Management: An Endocrine Society Scientific Statement**
George A. Bray, William E. Heisel, Ashkan Afshin, Michael D. Jensen, William H. Dietz, Michael Long, Robert F. Kushner, Stephen R. Daniels, Thomas A. Wadden, Adam G. Tsai, Frank B. Hu, John M. Jakicic, Donna H. Ryan, Bruce M. Wolfe, and Thomas H. Inge
PRÉCIS: *This Scientific Statement critically reviews the definition of obesity, providing a list of assessment methods, obesity-related diseases, and prevention measures.*

REVIEWS

- 133 **Evaluating Causality of Gut Microbiota in Obesity and Diabetes in Humans**
Abraham S. Meijnikman, Victor E. Gerdes, Max Nieuwdorp, and Hilde Herrema
PRÉCIS: *We have reviewed the evidence of the gut microbiome as a driving force in the development of obesity and type 2 diabetes mellitus. Considering overlap in potential mechanisms, the role of the gut microbiome in type 1 diabetes mellitus will also be addressed.*
- 154 **Diagnostic Utility of Molecular and Imaging Biomarkers in Cytological Indeterminate Thyroid Nodules**
Elizabeth J. de Koster, Lioe-Fee de Geus-Oei, Olaf M. Dekkers, Ilse van Engen-van Grunsven, Jaap Hamming, Eleonora P.M. Corssmit, Hans Morreau, Abbey Schepers, Jan Smit, Wim J.G. Oyen, and Dennis Vriens
PRÉCIS: *This review discusses the diagnostic utility of molecular and imaging biomarkers for thyroid nodules with indeterminate cytology, including considerations on local feasibility and cost-effectiveness.*
- 192 **The Extending Spectrum of NPC1-Related Human Disorders: From Niemann–Pick C1 Disease to Obesity**
Amel Lamri, Marie Pigeys, William S. Garver, and David Meyre
PRÉCIS: *This article reviews the implication of the NPC1 gene in obesity and its metabolic complications and proposes a mechanistic model to explain the link between NPC1 and metabolism.*
- 221 **Sexual Dimorphism and the Origins of Human Spinal Health**
Vicente Gilsanz, Tishya A. L. Wren, Skorn Ponrartana, Stefano Mora, and Clifford J. Rosen
PRÉCIS: *The smaller female vertebra is associated with greater spinal flexibility and lesser vertebral strength, probably contributing to a broad array of spinal conditions across the lifespan.*
