## Features

### P20 Autonomous tugs

Tugs are being used as a test bed for autonomous technology in a bid to improve the safety of operations in busy harbours and act as a supporting tool to reduce the workload and fatigue of tug captains

### P24 Simulating for safety

With advances in technology in the past decade, maritime is witnessing the rise of tailor-made simulators to improve training and aid accident investigations

### P30 Connecting the dots

Multiple major and collaborative big data projects are under way. Each one promises to make shipping safer and to reduce accidents. SAS explores whether these big ambitions will be realised and what is needed to fulfil them

## Regulars

### P4 Our say

Shipping must take action to prevent ship fires

### P5 Your say

An insight into the realities of seafarers' lives

### P6 News round-up

Viking faces class action law suit and burning feed injures 211 at Thai port

### P12 Security news

Arrest risk for PMSCs operating in West Africa

### P14 Training news

UK's largest simulator training centre opens

### P16 Shared concerns

Crew reveal the issues of on board rest hours

### P18 Inside the fleet

OSM Maritime break the mental health taboo

### P34 Security insight

### P35 Regulation insight

### P36 Sea Health & Welfare

### P38 MARS

### P40 Products

### P42 View astern

## On the cover

Artificial intelligence is coming aboard. SAS explores the risks and benefits of handing over safety-critical decisions to smart machines. P26
